Cytech 1 & 2 qualified

Cycle Tech believe in training our mechanics properly. All mechanics are sent through CyTech training in all aspects of bike maintenance. Workshop staff are trained with nationally recognized qualifications in bike mechanics. Cytech is a series of exams testing on all aspects of cycle repairs. This is organized through the Association of Cycle Traders (ACT) a body committed to encouraging high standards within bike shops throughout the country.

This is to certify that

Cytech 1 & 2 qualified

'CyTech' is an abbreviation of 'Cycle Technicians National Accreditation Scheme', which identifies the level of skills possessed by cycle technicians and their ability to assemble and service today's highly complex bicycles.

Mechanics and technicians taking the CyTech accreditation undergo stringent assessment, which includes having to demonstrate a sound knowledge of current technology, before any certificate is awarded.
